

# CONTENTS

<b>Preface</b> .....	xvi
----------------------	-----

## **PART ONE—STANDARD MARKET DESIGN**

### **Chapter 1: Credit of Some Sectors Will Be Affected**

<b>by SMD</b> (Ellen Lapson) .....	3
FERC Has Court Cases on Its Side .....	4
Key Provisions of SMD .....	5
Transmission Assets and Fees .....	5
Energy Markets .....	6
Reserve Adequacy .....	7
Independence and Accountability.....	8
Outlook for SMD .....	8
SMD's Potential Credit Implications .....	10
Public Power.....	11
New England .....	12
West.....	12

### **Chapter 2: Overview: FERC Trying to Reinvent**

<b>Electric Industry through SMD</b> (Dana Contratto and Keith Sampson) ....	15
A Comprehensive Plan.....	16
Congestion Management.....	20
Current Programs Are Limited and Lack Coordination.....	20
New Congestion Management System.....	21
Locational Marginal Pricing .....	21
LMP and Energy Markets.....	22
Congestion Revenue Rights.....	24
Types of CRRs.....	24
Receipt-Point-to-Delivery-Point Rights .....	24
Obligations and Options .....	25
Flow-Gate Rights.....	25
Auctions and Resales of CRRs.....	26
Initial Allocation: Direct Assignment or Auction?.....	27
Regional Planning and Transmission Expansion .....	28
Practical Concerns and Issues Raised .....	29
LMP: Will it Work in the Pacific Northwest? .....	29
Is FERC Backing Off Financial Rights? .....	30
What about those Pre-Order 888 Wholesale Contracts? .....	32
Auction of CRRs: Invitation for Market Manipulation? .....	33
Investment in New Transmission: Why Focus on Participant Funding? .....	33
No Access Charge Leading to Costs Shifting and Stifling of Investment? ....	34
Conclusion .....	35

**Chapter 3: Details of Standard Market Design Show**

**Comprehensive Effort** (Donald F. Santa, Jr.) ..... 37

Strong State-Level Reaction ..... 38

    Impact of State Reactions ..... 42

Features of the SMD NOPR ..... 42

    New Tariff and New Transmission Service ..... 42

    Independent Transmission Providers ..... 42

    Creating a Single Network Access Service ..... 43

    Transmission Pricing..... 44

        Recovery of Embedded Costs ..... 44

        Interregional Transfers ..... 45

        Pricing New Transmission Capacity ..... 45

    Congestion Management ..... 46

        Locational Marginal Pricing: ..... 46

        Locational Marginal Pricing and Energy Markets: ..... 47

        Congestion Revenue Rights ..... 47

    Day-Ahead and Real-Time Market Services ..... 49

        Day-Ahead Scheduling and the Day-Ahead Market ..... 49

        Real-Time Markets ..... 51

    Other Changes to Improve the Efficiency of Markets under SMD..... 51

        Capacity Benefit Margin ..... 52

        Calculation of Available Transfer Capability, Facility Performance  
        Studies, and OASIS ..... 52

        Regional Planning Process ..... 52

        Transmission Facilities under Control of Independent  
        Transmission Provider..... 53

    Transition to Single Transmission Tariff..... 53

        Treatment of Customers under Existing Wholesale Contracts ..... 53

        Allocation of Congestion Revenue Rights..... 53

        Reciprocity Provision ..... 54

        Force Majeure and Indemnification Provisions ..... 54

    Market Power Mitigation and Resource Adequacy Requirement ..... 54

        Local Market Power ..... 55

        Safety-Net Bid Cap ..... 55

        Mitigation Triggered by Market Conditions..... 56

        Establishing Bid Caps or Competitive Reference Bids..... 56

        Monitoring-Overall Market Efficiency and Individual Conduct ..... 57

        Framework for Analyzing Market Structure and Market Conduct ..... 58

    State Participation ..... 61

        Regional State Advisory Committee:..... 61

        Functions of the Regional State Advisory Committee ..... 62

    Governance for ITPs ..... 62

Responsibilities of the Board of Directors ..... 62

    Stakeholder Participation ..... 62

    Initial Selection Process for Board of Directors ..... 63

Security Programs ..... 64

<b>Chapter 4: Standard Market Design Undergoing Evolution from State Inputs</b> (William H. Smith, Jr.).....	65
Origins .....	65
Order 636 .....	65
Orders 888 and 2000 .....	66
The Need for a Standard Market Rule.....	67
Limits of 888 and 2000.....	68
Retail Competition .....	68
Market Failures .....	69
Infrastructure and Uncertainty .....	70
Unfair Business Practices and Undue Discrimination.....	71
Response Greater than Problem? .....	71
The Vision .....	72
A Modest proposal .....	72
Independence and Governance .....	72
Need For Balance of Interests .....	73
Network Access Service and Tariff .....	74
Questions about Economics and New Facilities.....	74
Congestion Management-Locational Marginal Pricing, Firm Transmission Rights, and Day-Ahead Markets .....	75
Generation Adequacy and Demand Response .....	76
Market Monitoring and Mitigation.....	77
Questions about Independence of Monitor and More Questions about Economics.....	77
Regional State Advisory Committees .....	78
States Having Some Input .....	78
Outreach.....	78
Reaction .....	79
Varies by Region .....	79
Federal Politics Enter the Fray .....	80
Economics.....	80
All politics Are Local .....	80
Dialogue from the FERC .....	81
Softening It Down, Thanks to the States .....	81
Gas To Benefit.....	81
Gas Versus Electricity Competition.....	81
Netback pricing .....	82
Outlook.....	82
<b>Appendix 4.1: Characteristics and Functions of Regional Transmission Organizations</b> .....	83
<b>Appendix 4.2: Unfair Business Practices and Discrimination Providing Basis for Devising SMD</b> .....	86
Preference for Native Load Growth .....	86
Delays in Requests for Service .....	86
Capacity Request Imbalance Resolution.....	86
Posting of Available Capacity .....	86
OASIS Postings.....	86

## Contents

Capacity Benefit Margin Manipulation.....	87
Discretionary Transmission Loading Relief.....	87
Enron-Type Trading Strategies. ....	87
<b>Appendix 4.3: FERC's Phased Compliance Process for SMD .....</b>	<b>88</b>

## **PART TWO—INDUSTRY SETBACK AND OUTLOOK**

### **Chapter 5: Meltdown in the Trading and Marketing Industry**

(Benjamin Schlesinger).....	91
Gas Surplus Ends and California Problems Begin the Slide.....	91
Energy Trading Declines .....	94
Basis Trading.....	95
Multiplying Scandals .....	97
Looking Ahead.....	98
Domestic Gas Production .....	98
Liquefied Natural Gas (LNG) .....	99
Rising Power Plant Needs .....	100
Resurgent Trading Activities .....	100
Postscript .....	101

### **Chapter 6: Current Bankruptcy Affairs**

<b>Are Not All about Enron</b> (Professor Anthony Michael Sabino).....	103
The PG&E Bankruptcy-Federal Versus State Powers.....	103
Oil and Gas Acquisitions—a Risky Business, but Not a Fraud .....	107
Lessons Learned.....	111
And Now Enron.....	112
A Committee of One .....	112
What Can Be Learned from This.....	114
Keeping the Pipelines Open to Enron .....	114
New York, New York ...If Enron Can Make It There .....	117

### **Chapter 7: Merchant Electric Generation Boom Ends,**

<b>but Surplus to Vanish Soon:</b> (Douglas M. Logan).....	121
Industry Status .....	122
Plant Cancellation .....	124
Regional Comparison.....	126
Prior Status of Projects Now Tabled or Canceled .....	128
Projects Moving Forward .....	129
Projected Supply / Demand Balance .....	131
Status Code .....	132

## Contents

Region	132
Project Type.....	132
Boom/Bust Cycles .....	135
The Outlook .....	137

### **Chapter 8: Recent FASB Rulings Affecting Valuations**

(Gregory E. Scheig) .....	139
FASB's Goal of Fair Value Reporting .....	139
Recently Implemented Standards .....	140
SFAS 141: Business Combinations .....	140
Business Enterprise Value .....	140
Goodwill.....	141
Tangibles and Intangibles .....	142
SFAS 142: Goodwill and Other Intangible Assets .....	143
Valuation Methodologies .....	143
Income Approach.....	144
Forecast Operating Income .....	144
Market Approach.....	146
Guideline Company Analysis .....	146
Publicly Traded Comparables .....	147
Guideline Approach Values a Minority Ownership .....	147
Transaction Analysis .....	148
Multiples .....	148
Fair Value .....	148
Impairment .....	149
Electric and Gas Example .....	149
Income Approach .....	150
Cost of Capital .....	150
Income Approach Conclusion .....	152
Market Approach.....	152
Market Multiples Method-Gas .....	152
Market Multiples Method-Electric .....	152
Market Approach Conclusion .....	153
Conclusion of Fair Market Value .....	153
Compliance Issue or Future Class Action .....	153
Fuel for Class Action Lawsuits? .....	153

## **PART THREE—TOWARDS MORE-ABUNDANT NATURAL GAS SUPPLIES**

<b>Chapter 9: Future of "Unnatural Gas," or Coal Gasification, Could Be Bright</b> (Robert C. Means).....	161
Competition between Coal and Natural Gas .....	162
Price Advantages of Coal.....	163
Cost Advantages of Natural Gas .....	165
Triumph of Natural Gas .....	165
Greater Competitive Flexibility .....	166
Smaller Environmental Impact .....	167
Relevance of Environmental Costs.....	170
A Bridge Too Short .....	170
Looking for Plan B .....	175
Summing Up .....	176
Clean Coal .....	177
Traditional Meaning of Clean Coal.....	177
Contemporary "Clean Coal" .....	177
Increased Efficiency .....	178
Postcombustion Removal of Pollutants .....	178
Precombustion Transformation of the Coal: Integrated Gasification Combined Cycle .....	179
Advantages of IGCC .....	179
The Technology Obstacle.....	180
The Cost Obstacle .....	180
The CO <sub>2</sub> Problem.....	182
Conclusion.....	182
<b>Appendix 9.1: A Note on the Cost of CO<sub>2</sub> Emissions</b> .....	184
<b>Chapter 10: Alaskan North Slope Gas Pipeline Gives Results Hard to Quantify</b> (David E. Dismukes, Dmitry V. Mesyanzhinov, Jeffrey M. Burke, and William E. Nebesky).....	185
Baseline Alaska In-State Natural Gas .....	188
Demand Growth .....	188
Providing Natural Gas Access to Unserved Areas .....	191
Are There Potential New Uses of Gas?.....	193
Petrochemical Application .....	193
Fuel Switching.....	195
Internet Server Farm Application .....	197
Gas-By-Wire Application .....	199
Change in In-State Opportunities with a Southcentral Imbalance .....	200
Conclusions: Do the In-State Opportunities Stack Up? .....	204
<b>Chapter 11: Fuel Forecasting in Volatile Markets Makes for Believable Strategies</b> (Bethel King) .....	206
Natural Gas As a Fuel .....	207
Fundamental Natural Gas Model .....	209
Analysis of Results .....	213
Tuning Natural Gas and Power Models Together .....	216

Conclusion ..... 216

## PART FOUR— INTERNATIONAL

### CHAPTER 12: Prospects Strong for Global LNG Trade

(Ralf Dickel and Sylvie Cornot-Gandolphe) ..... 219

The Long-Term Prospects for Gas..... 219

Increasingly Abundant Gas Reserves ..... 220

Growth of Primary Energy Supply of Gas ..... 221

International Trade ..... 223

Costs of LNG Versus Pipeline Transportation ..... 224

Recent Developments in International LNG trade ..... 226

Global trends ..... 226

Impact of Market Reform on Asian and European LNG markets ..... 228

New Trading Arrangements 229

Exporters ..... 229

Importers ..... 230

Development of Pricing Provisions ..... 231

Regional Pricing ..... 231

Driving Forces in the Development of an LNG Spot Market ..... 232

Spare Capacity at Liquefaction Plants ..... 232

Shipping ..... 233

Regasification Terminals ..... 233

Global Gas Market..... 234

### Chapter 13: Political Risk, Terrorism, and Other Insurance Rates

**Hike** (Julie A. Martin, Gregor McQueen, David Balderach) ..... 235

State of the Insurance Market ..... 238

1990s—the Soft Market ..... 238

Return of the Hard Market ..... 238

The Impact of the Hard Market ..... 240

Terrorism Risk..... 241

Terrorism Risk Modeling ..... 242

Property Terrorism Insurance: What's Currently Available? ..... 242

Rates ..... 242

Capacity..... 243

Coverage ..... 243

Terrorism Risk Insurance Act of 2002 ..... 243

Political Risk ..... 244

Currency Devaluation Coverage ..... 247

Capital Markets Coverage ..... 247

State of the Political Risk Insurance Market ..... 248

Margin Stabilization Agreements ..... 249

Conclusion ..... 252

**Chapter 14: International Commercial Arbitration Continues To Grow** (William K. Perry and Philip J. Goodman) ..... 253

Why Arbitration? ..... 254

Concerns Regarding Foreign Court Systems ..... 254

    Privacy ..... 254

    Flexibility and Control ..... 254

    Enforceability ..... 255

    Fairness ..... 255

Importance of Treaties ..... 255

Choosing the Appropriate Rules and Arbitral Institution ..... 257

    Ad Hoc Arbitration ..... 257

    Arbitral Institutions ..... 258

    Choosing Between Institutional and Ad Hoc Arbitration ..... 259

    Good Arbitration Clauses ..... 260

    Other Issues to Address ..... 263

    Avoid "Pathology" ..... 265

    Prehearing Provisional Measures ..... 265

    "Fast Track" Procedures ..... 266

Arbitrating With Foreign Governments ..... 268

Conclusion ..... 271

**APPENDIX 14.1: Model Ad Hoc and Institutional International Arbitration Clauses and Associated Commentary** ..... 272

    UNCITRAL Model Arbitration Clause ..... 272

    American Arbitration Association ..... 272

    International Chamber Of Commerce Standard Arbitration Clause ..... 272

    London Court Of International Arbitration ..... 273

    Stockholm Chamber Of Commerce Model Arbitration Clause ..... 273

## PART FIVE—FEDERAL OVERSIGHT

**CHAPTER 15: Electricity I: FERC Does Much Innovative besides SMD** (Donald F. Santa, Jr.)..... 277

FERC's Strategic Plan..... 278

FERC's Office of Market Oversight and Investigations ..... 278

California/Western Interconnection ..... 280

    Price Mitigation/Refund Proceeding..... 280

        Refund Proceeding Hearing Order ..... 280

        December 2001 Price Mitigation Orders ..... 281

        May 2002 Orders on Rehearing ..... 282

        Summer 2002 Hard Price Cap ..... 282

        Post-October 1 Market Mitigation and California Market Redesign... 283

Administrative Litigation Seeking to Reform Long -Term Power

    Contracts/Mobile Sierra Issues ..... 284

    Proposed Mobile-Sierra Policy Statement & Meaning of Doctrine ..... 286

## Contents

Power Markets to Be Affected .....	288
CAISO Independence .....	288
Enron Investigation .....	291
Fact-Finding Investigation concerning Market Manipulation .....	291
Enron Trading Practices Disclosure .....	292
Interim Staff Report Concerning Western Market Manipulation and Formal Investigations.....	295
Loans by Enron's Interstate Pipelines.....	296
RTO Developments 297	
Generic RTO Implementation .....	297
Guidance on the Role of Independent Transmission Companies .....	300
Return on Equity as an Incentive to Join an RTO.....	300
Merchant Transmission .....	302
Commission Input on RTO Tax Policy .....	303
Regional RTO Implementation.....	304
Northeast .....	304
Midwest .....	305
Southeast .....	307
Northwest .....	309
Southwest .....	310
Relationship between RTO Decisions and SMD Rulemaking .....	311
<b>Appendix 15.1: FERC's Goals .....</b>	<b>313</b>
<b>CHAPTER 16: Electricity II: FERC Tightens Current Regulatory Regime (Donald F. Santa, Jr.) .....</b>	<b>317</b>
Market-Based Rate Authority.....	317
Market Power Analysis .....	318
Impact .....	320
Revision to Market-Based Rate Tariffs .....	320
Standards of Conduct.....	322
Generator Interconnection .....	326
Security and Critical Infrastructure Issues.....	329
Security .....	329
Critical Infrastructure .....	329
Reporting Requirements .....	330
 <b>Chapter 17: Natural Gas I: Stakeholders Speak and FERC Listens in Planning Agenda (Dena Wiggins ).....</b>	 <b>332</b>
Natural Gas Supply and Demand Issues-Anticipated Long-Term Growth Issues .....	333
LNG .....	336
Outer Continental Shelf.....	339
Pipeline Service Options.....	341
Market Power at the City Gate .....	344

**Chapter 18: Natural Gas II: Intense Activity in Pipeline**

**Security Plans** (Richard G. Smead) ..... 346  
 Three Broad Areas of Security Review ..... 347  
 Basic Priorities of Security Efforts ..... 348  
 Overview of Agencies Involved..... 349  
 CEII Initiative ..... 350  
 Physical Pipeline Security ..... 353  
 Designation of Critical Facilities ..... 354  
 Redundancy of Facilities or Systems ..... 355  
 Disaster Recovery Measures and Analysis ..... 356  
     Capacity Restoration ..... 357  
     Preservation of Service During Emergency ..... 359  
     INGAA/AGA Modeling Effort ..... 361  
 Summary and Future of Security Issues ..... 363

**Chapter 19: Litigation Gives FERC Significant Wins and**

**Losses** (Donald F. Santa, Jr.) ..... 366  
 Outlook ..... 366  
*New York v. FERC*, Order 888 Judicial Review (U.S. Supreme Court) ..... 367  
     Outlook from Decision..... 368  
*Public Utility District I of Snohomish County, Washington V. FERC*,  
 Order 2000 Judicial Review (D.C. Circuit) ..... 368  
     What's Ahead ..... 369  
*Atlantic City Electric Company v. FERC*, Section 205 Tariff Filing  
 Rights and Scope of Section 203 Authority (D.C. Circuit) ..... 369  
     Impact ..... 371  
  
*Sithe/Independence Power Partners, L.P. v. FERC*, Transmission Losses  
 in the New York ISO (D.C. Circuit) ..... 371  
     Impact ..... 372  
*Pacific Gas and Electric Company v. Lynch*, Filed Rate Doctrine Applies  
 to Market-Based Rates (California District Court)..... 373  
 Impact ..... 374

**PART SIX—STATE REGULATION**

(NOTE: See also Chapter 4:Standard Market Design Undergoing Evolution from State Inputs (William H. Smith, Jr.) for a discussion of state-level considerations about FERC’s Standard Market Design)

**Chapter 20: Volatile Markets Demand Change in State Regulatory**

**Evaluation Policies** (Frank Graves and Steve Levine)..... 377  
 Hedging Facts and Why Hedging Does Not Reduce Costs ..... 378  
 Case Study: Hedging through the 2000–2001 Gas Price Spike..... 379

## Contents

Hedging Policy Principles .....	384
New Regulatory Approach to Evaluation Required .....	386
Conclusions—a Window of Opportunity .....	388
<b>Appendix 20.1: Supply and Demand Factors Impacting Gas Price</b>	
<b>Volatility</b> .....	391
Demand Factors .....	391
Supply Factors .....	394
LNG and Alaska Projects .....	401
Storage .....	401
Implications for Gas Price Volatility .....	403

## PART SEVEN—PERSPECTIVE

### Chapter 21: Recognizing Limits of Markets, Rediscovering

<b>Public Interest in Utilities</b> (Mark Cooper) .....	409
Five Public Values that Affect the Electricity Industry .....	410
Public Infrastructure .....	410
Public Resources .....	411
Public Participation and Cooperation .....	411
Public Responsibility .....	412
Public Information and Knowledge .....	412
Pragmatic Approaches Centered on Core Public Values .....	413
The Incredible Shrinking Benefits of Restructuring and Deregulation .....	416
Outline of the Paper .....	419
A Vital, Inherently Volatile Commodity .....	419
Demand .....	419
Supply .....	421
Weak Market Forces Make for Bad Markets .....	423
Empirical Elements of Classic Rents .....	429
Market Transactions Raise the Cost of Utility Services .....	432
Merchant Generators and Transmission Raising the Cost of Capital .....	432
De-integration Increases Transaction Costs .....	434
Inadequate Reserves .....	436
California's Wild Ride .....	438
Racing To Disaster.....	438
Greed .....	439
Regulatory Irresponsibility That Harms the Public .....	441
Regulatory Mismanagement Makes Matters Worse .....	442
Breaking the Market Power of the Merchant Generators .....	445
Why West and South Want to Avoid FERC's SMD, and Why Northeast Does Not Care .....	447
Deregulation: a Solution In Search of a Problem.....	447
South-Inelasticity of Supply Creates Excess Scarcity Rents and Threat of Abuse .....	450

## Contents

West-Reliance on Hydro, Long-Distance Transmission Cause Risks under the SMD.....	453
Pennsylvania: Muddling to Nowhere .....	456
Conclusion: When the Solution Becomes the Problem .....	461
Sources for Tables 21.3 and 21.4.....	464
<b>Appendix 21.1: Causes of Electric Utility Industry Market Failure from Three Years of Deregulation .....</b>	<b>466</b>
<b>Abbreviations.....</b>	<b>469</b>
<b>Editor/Publisher and Contributors .....</b>	<b>471</b>
<b>Index.....</b>	<b>473</b>
